Quotations: Observe, Analyze, Imitate

**Directions**: Find a direct quotation in one of your assigned scholarly sources, a quotation that is something “they say.”

1. **OBSERVE**: How does the writer introduce the quotation? How does the writer explain the quotation?
2. **OBSERVE**: How does the writer explain the quotation?
3. **ANALYZE**: What purpose does the quotation serve? What work does the quotation do for the writer? Does it follow one of the templates?
4. **IMITATE**: Create a template from the example and imitate the form you have observed, both introducing and explaining a quotation.
